Resume tips for Health students

A Career Counsellor’s Advice

Don’t get too stressed if you don’t have a specific job title in mind while you’re studying. Keep your options open – but don’t just wait and hope that things will work out by the time you finish your degree!

Make the most of any opportunity to explore career possibilities while you’re studying. Research occupations, check newspaper/web adverts and articles, talk to people in the industry, do voluntary work, talk to your lecturers, and see a career counsellor – get active!

Taking a proactive approach to your career development means that you’ll learn more about yourself and the opportunities out there in the world of work – and be much better placed to obtain the job you want when you finish.

Real-world Student

This accredited degree really puts me miles ahead in terms of getting a job once I graduate. We’re really multi-skilled when we graduate: we’re trained in various fields, such as haematology, immunology, microbiology. That’s really valuable to employers.

Jacquie, Bachelor of Medical Laboratory Science

- **Career Mentor Scheme**: connect with an industry professional in your field of interest
- **Info sheets**: Resume and Cover Letter writing, Employment Seeking, Interviews etc.
- **Work Experience Insurance**

How to increase your employability...

**Start of your degree (first year):**

- Start networking / information interviewing for information about positions and employers for graduates of your course
- Look into the benefits of joining student or professional associations
- Attend the Careers Fairs and employer presentation sessions on campus
- Start looking for relevant work experience / voluntary work / work shadowing opportunities
- Start developing transferable skills (i.e. team work, time management, communication) through work experience and uni assessments.
- Start thinking about where you want to end up when you finish your degree (what’s your dream job and what steps can you take to get there?)

**Middle of your degree (Years 2 & 3):**

- Continue to build your professional network
- Gain some relevant work experience
- Assess which transferable skills you need to build on
- Attend the Careers Fairs and employer presentation sessions on campus

**Final Year (Year 4):**

- Prepare your unique professional resume for graduate work. You may also like to create a professional profile on LinkedIn
- Continue with networking, work experience and skill development
- Participate in the QUT Career Mentor Scheme
- Search for job opportunities through the networks you have made
- Search for job opportunities through advertised positions and job search websites. Remember that for many graduate programs applications close by April of your final year of study

Talk to people about working in your industry – your classmates, lecturers, tutors, and exhibitors at careers fairs and employer presentations. You can also use websites such as LinkedIn to research job roles and employers. Find out what kind of job you might want to aim for.
