Get a head start on your career now!

A Career Counsellor’s Advice

Don’t get too stressed if you don’t have a specific job title in mind while you’re studying. Keep your options open – but don’t just wait and hope that things will work out by the time you finish your degree!

Make the most of any opportunity to explore career possibilities while you’re studying. Research occupations, check newspaper/web adverts and articles, talk to people in the industry, do voluntary work, talk to your lecturers, and see a career counsellor – get active!

Taking a proactive approach to your career development means that you’ll learn more about yourself and the opportunities out there in the world of work – and be much better placed to obtain the job you want when you finish.

Examples of where your course could lead:

Sample Positions
- Process Engineer
- Chemical Engineer
- Consulting Engineer
- Process Technologist
- Industrial Engineer
- Operations Engineer
- Production Manager
- Factory Manager

- **Career Mentor Scheme**: connect with an industry professional in your field of interest
- **Info sheets**: Resume and Cover Letter writing, Employment Seeking, Interviews etc.
- **Work Experience Insurance**

**How to increase your employability...**

**Start of your degree (first year):**
- Start researching organisations you might like to work for, and make contacts in your area/s of interest to gather information about career pathways for graduates of your course
- Attend career and networking events in your area of interest, e.g. Careers Fairs, Faculty Events and other industry events.
- Begin looking for relevant work experience / voluntary work / work shadowing opportunities
- Start thinking about where you want to end up when you finish your degree (what’s your dream job and what steps can you take to get there?)

**Middle of your degree (Years 2 / 3):**
- Continue to build your professional network
- Gain some relevant work experience
- Work on developing your transferable skills (i.e. team work, time management, communication) through work experience and uni assessments
- Attend the Careers Fairs and employer presentation sessions on campus

**Final Year (Year 3 / 4):**
- Prepare your unique professional resume & portfolio for graduate work, and create your professional profile on LinkedIn
- Continue with networking, work experience and skill development
- Participate in the QUT Career Mentor Scheme
- Search for work opportunities through the networks you have made
- Search for job opportunities through advertised positions and job search websites.

Talk to people about working in your industry – your classmates, lecturers, tutors, and exhibitors at careers fairs and employer presentations. You can also use websites such as LinkedIn to research job roles and employers. Find out what kind of job you might want to aim for.
