Profile

The ATO is an international leader in tax administration. We’re a large, dynamic, progressive and innovative organisation. We deal with individual taxpayers, small and large businesses, non-profit organisations and tax agents. Our work addresses issues such as aggressive tax planning, globalisation and the cash economy and also supports the delivery of community benefits. We have offices located throughout Australia and employ over 22,000 employees. What we offer graduates

You will be part of a 12 month program offering career development, further training and challenging work. Our program is divided into six streams so your work, training and development are tailored to suit your area of interest.

Law, Finance and Taxation

Be active in audit and advice, workplace law, litigation, financial management and revenue analysis while building internal and external client relations.

Degrees: accounting, business, commerce, economics, finance, criminology and law.

Marketing Communication

Develop strategies and campaigns, write and edit, work on websites and publications, promote new products and services, graphic design and manage media and public relations.

Degrees: arts, communications, business, marketing, media, journalism and graphic design.

Information Technology

Contribute to leading edge IT solutions in application or web development, business analysis, IT security, IT architecture, testing, infrastructure support and project management.

Degrees: information technology, engineering, computer science and information systems.

People Management

Work on a range of people management initiatives, strategies and projects, including recruitment, health and safety, leadership development, industrial relations, workforce planning, performance, policy and workplace diversity.

Degrees: human resources, psychology, business and arts.

Business Design

Use information design, workshop facilitation, business analysis and user-centred research to design new or improved products, systems and processes.

Degrees: graphic design, design, information technology, human and information services, business, organisational psychology, management and social sciences.

Business Management

Improve strategies, resources and business processes to enhance service delivery in administering the tax system including revenue collection, customer service and business support.

Degrees: business, business management, commerce, government and public relations.

Application Process
