Powerlink Queensland

Development Engineers Program

Powerlink is a government-owned corporation which owns, develops, operates and maintains one of the world’s most reliable high voltage electrical transmission networks. As our network and organisation grows, the opportunities for graduates are endless. Never has there been a more exciting time to join Powerlink Queensland and kick start your career in the electrical supply industry.

Make the connection with our Development Engineers Program

Our internationally recognised Development Engineers Program offers recent university graduates an ideal platform to kick start their career in electrical or civil engineering fields. Working for one of the most successful organisations in the electrical transmission field, you will thrive as a key member of Powerlink’s future.

Being a Powerlink Development Engineer means you get to work with and learn from talented engineering and development professionals. You will be offered an outstanding opportunity to experience the widest variety of areas within our business including, but not limited to, planning, maintenance, strategy, operations, design, and project and construction.

Your structured training and development plan will enable you to perform your role efficiently and successfully and allow you to accelerate your career as a development engineer.

Apply now

If you are in your last year of an engineering degree and keen to join a world leader in electricity transmission, apply via the ‘Careers’ section at www.powerlink.com.au

Applications close midnight Sunday 3 April 2011 (EST).
