The Human Resource Manager
ABCD Computer Systems
Orchard Road
Singapore

Dear Sir/Madam

I have just completed a Bachelor of Information Technology at Queensland University of Technology in Brisbane Australia. My major area is Software engineering and I have substantial interests in XXXX.

I am seeking work at home in Singapore for 2005 in my specific IT area and, I believe that I may be of interest to your company. From my research I notice that your company is very involved in net work security, that the languages you favour are a,b,c and that you also have branch offices in Australia.

One of my major interests is network security. I have undertaken project work in this area for the Trouble Casino and also as part of my degree chose this for an in-depth study. I am very familiar with the programming languages of a, b and c. As I have lived and studied in Australia for the last 3 years, I have a good understanding of Australian business practices and protocol, and people, so should be able to assist in communication with Australian clients and colleagues. I have developed substantial networks in Australia.

I would appreciate the opportunity to discuss possible options with you. I will be in Singapore from 1/1/05 but am available for a phone interview at any time. Enclosed is a copy of my resume and academic record.

Yours faithfully

T. Student
